

TECHNICAL PROJECT MANAGER

DEPARTMENT:

Engineering

TERRITORY:

Global

LOCATION:

Pocasset, MA
Onsite 3x/Week,
WFH 2x/Week

COMPANY DESCRIPTION:

Global Interconnect, Inc. (GII) is a US-Asia based engineering, supply chain and manufacturing firm with large growth goals. Our primary focus is innovating within the connector, cable, and electro-mechanical assembly market specifically for medical devices by partnering with large medical OEMs to produce significant business outcomes.

JOB DESCRIPTION:

GII is looking to add a Technical Project Manager to their Engineering team with experience driving and tracking - project efficiency, visibility and excellence throughout the product lifecycle. Their goal is to drive new & sustaining projects ensuring communication and alignment between internal teams as well as with our manufacturing partners and clients. This person will have high visibility within the organization as they will be working across several internal teams to ensure successful delivery of all projects.

WHO YOU ARE:

- 5+ years working experience managing product life cycle planning for all new projects as well as existing engineering projects going through design changes/improvements.
- You must be a leader. You will not hesitate to raise your hand, ask questions, and challenge internal and client teams to mitigate any issues/misunderstandings that would delay or alter timelines.
- You excel at formulating project plans and balancing inputs coming from engineering, customer success, and sales teams as projects, and project changes, move through the product lifecycle.
- You have experience using Gantt charts or other similar tracking technologies (MS Project, Asana, Trello, etc) to track project timelines and resource utilization.
- Projects/product timelines can change rapidly/frequently as such this person MUST be able to adjust plans and adapt accordingly.
- Attention to detail along with organizational and communication skills are critical.

DESIRED BUT NOT REQUIRED:

- You have existing familiarity with medical connectors/device design.
- You have an Engineering/Technical background and have transitioned, or hope to transition, into more of a technical project manager.

WHAT YOU'LL BE DOING:

- 100% throughout - Responsible for proactive follow up with the internal and external resources based on the Gantt chart. This includes but is not limited to drawing/model completion, component/subassembly/assembly delivery, test plans/report completion, documentation delivery, etc.
- 15% - Meeting with engineering and leadership to review projects, understand timelines, risks, etc. Subsequent creation and maintenance of project plans, Gantt chars, etc.
- 50% - Meetings with both internal and client/partner teams to ensure timelines are on track. Communicating potential project successes/setbacks internally and externally to ensure all parties are on the same page.
- 35% - Constant elevation of process improvements – You will strategize with engineering, design, and supply teams on potential time saving or problem mitigation measures for both current and future projects.

COMPANY CULTURE:

GII consists of highly motivated individuals who take initiative and go above and beyond each day to help their customers and colleagues be successful. We are understanding and empathetic to the challenges of life and strive to give our employees the flexibility to achieve the ideal work-life balance.

OUR CORE VALUES:

- Create Fun
- Build A Positive Team
- Embrace and Drive Change
- Pursue Growth and Learning
- Do More With Less
- Communication Is King
